

Medi-Body Pack

Poison Oak, Mosquito Bites, Bee Stings, Rashes are all skin irritations that the body takes days to absorb and excrete through the Kidneys.

Broken bones, bruises, sprains, whiplashes, scars from surgery or injuries damage not only the physical body but the energy body as well. The energy body is that subtle part of us that is more of a spiritual substance than physical. Chinese Medicine focuses on this energy body and the pathways through which it flows, called meridians. Acupuncture uses needles to turn on the flow of energy through the meridians. Making stagnant energy move again with acupuncture is the goal.

If you ever seen Kirlian photos of leaves you will know that the energy body shows as a corona hallow around the leaf. After you cut the leaf in half and retake the photo you can see the corona for the entire leaf is still there even though half of the physical leaf is gone.

This is proof of the existence of the energy body in all living things.

Any time damage is done to a part of your body, especially after puberty, then even though the physical body may heal the energy body can be damaged. Now this energy body is like a river feeding other parts of the body the necessary energy to function. This energy flow is now interrupted and unable to feed other areas of the body. Now chronic low organ function and tissue deterioration will begin in any area where the energy is not flowing. This is then called an interference field.

An example is a woman who had surgery for her hammer toe on her left foot which is calcium deposits built up in the joints of the toe. After this surgery on the left foot she began to have her hip socket cartilage deteriorate in the left hip. This is the same side as the surgery. After working with a practitioner trained in Quantum Reflex Analysis, like myself she discovered she had an interference field reflexing from the foot surgery to the left hip. She was planning on getting hip socket replacement surgery. After doing the Medi-Body Packs on the left foot her condition began to improve. Her hip socket is now healing and she no longer planning on the hip socket replacement. Another case is a woman who had an episiotomy scar interference field. This was reflexing to her adrenals and creating chronic low adrenals and fatigue. She used the Medi-Body Packs and cleared the interference field and now has much more energy.

The Medi-Body Pack is a special mix of para-magnetic and di-magnetic minerals, as well as herbs that when mixed with Heavy Metal Nano Detox forms a clay. This clay applied topically to the area of injury will restore the energy body to normal and clear the interference field. When applied to Poison Oak, Mosquito Bites and the like the poison is drawn out and the pain and itching goes away quickly. For myself the poison Oak rashes that I got this summer from hiking in the forests would go away right after using one clay pack. All the itching would go away after one clay pack. I know someone else who had a little more severe outbreak of poison oak and after three Medi-Body Packs, over 45 minutes, her itching and swelling went away without further treatment.

The Medi- Body Pack infuses an area with minerals that restore conductivity to the tissues and the energy body. It also draws out toxins of all kinds, thus alleviating the burden the body may have from having to filter the toxins out through the kidneys or bowels. Up to 50% of the poisons in an old scar or injured area can come out into the clay in one pack. Scars that are longer than 3 inches always have a hidden infection going on in them.

The Medi-Body pack is awesome for pain and or injuries of all kinds. It should be a part of everyone's medicine cabinet.

Clay is now what the US Army uses to pack a wound on the battlefield. The inferior clay that they use still works to keep the wound free of infection.
