Scientific Breakthroughs for Radiant Health

Mineral Magic – Monoatomic Mineral Nutrition

Dr. Linus Pauling, winner of 2 Nobel Prizes stated: *"You can trace every sickness, every disease and every ailment to a mineral deficiency."* That is how crucial minerals are and why they should be at the foundation of anyone's program.

Wake up America! Our soils are depleted of vital minerals, which are not being replaced. This leads to improper development of young people, mental disorders, eating disorders, and all other diseases.

The brilliant Dr. William Albrecht, a soil biologist showed that the level of calcium in the soil directly affected the level of protein in the vegetation. Low calcium soils produced low protein vegetation in both quantity and quality of protein. Repeated animal experiments conducted have shown that cows, pigs and all other vegetarian animals instinctively would eat high protein vegetation over the low protein vegetation. They would even eat weeds preferably over grass if they had higher mineral and protein levels.

Today's soils are missing three fourths of the calcium supply they once had, leaving our entire plant food supply deficient in both quality and quantity of protein.

Trace minerals link with proteins in the body to create enzymes. Enzymes both break things down for excretion and they are required to assemble proteins, fats and carbohydrates into useable forms. Enzymes are at the foundation of all tissue synthesis. With a sufficient supply of trace minerals all tissue repair in the body can be carried out.

Literally every cellular function is dependant upon enzymes, which are dependant upon minerals. We have trillions of enzyme reactions going on all the time in our bodies. Some maintain our pH, others maintain our immunity, others affect our intelligence and some affect the reproductive system. Every single aspect of our health is dependant upon minerals.

Even one mineral shortage can throw the entire balance off and one deficiency can render other nutrients ineffective.

In 1936 the US Senate convened and reported in document 264 that the soils in North America were depleted by 85%. The situation is so serious that in 1936 the U.S. Senate warned us!! And now its 60 years later and nothing has been done. In 1993 The World Health Organization reported 95% total depletion!

People wonder why they crave, junk food, alcohol, nicotine, caffeine, candy and soda pops and or have eating disorders. It is because their lack of trace minerals leaves them perpetually hungry, so that even after a full belly you may still want more. Animals have been known to suffer the same problem, called pica. When a horse is deficient in minerals it will chew the wooden feed box or fencing. Humans do not go around eating their wooden furniture but instead eat junk food and take or use drugs. These cravings and additions disappear when they get sufficient minerals. I have had clients tell me that after getting on minerals that their craving for coffee and marijuana went away. With sufficient minerals you can begin to crave what's good for you.

A peaceful nervous system comes from all the glands producing all the hormones and the symphony of balance that comes from them. MINERAL MAGIC is a foundational ingredient to make this happen. Any attempt to improve learning abilities, brain functioning or one's eating habits, must include minerals to achieve it. The body has never needed Ritalin, antidepressant or appetite suppressant drugs. The body has always needed trace minerals and can return to normal functioning once it gets them.

I could go on and on about minerals, especially for couples planning to have children. If you want to avoid birth defects, if you want to avoid having a child with mental defects that could lead to criminal behavior or make that person a dependant upon others, if you want to have a physically beautiful, mentally brilliant, physically coordinated, emotionally

happy child and eventually adult to bring into the world then consider the essential role of supplementation and especially minerals from MINERAL MAGIC.

I just finished consulting with a couple that had spent \$12,000 on artificial insemination techniques for conceiving their own child. After my client got onto a program with me, which included MINERAL MAGIC, WHITE GOLD LIQUID, PLATINUM GROUP and ZINC ASSAY, his sperm count went from 20,000 to 51,000 and they were all healthy swimmers. All 4 eggs to which they were exposed were successfully fertilized.

MINERAL MAGIC has 68 trace minerals from once living vegetation that confers all necessary minerals for more energy production. It is uniquely different than other mineral supplements as one, it was created by nature not man, two it contains paramagnetic minerals (which is a mineral that becomes magnetic in the presence in magnetic fields such as the cells of your body). This is significant because in the book 'Secrets of the Soil' we learn that plants thrive in soils that have paramagnetic minerals in them much better than without. Anything, which improves the health of plants, improves the health of humans. Lastly it contains naturally occurring monoatomic (single atoms) minerals. Monoatomic minerals are able to increase the rate at which electrons flow over the DNA strand by 10,000 times. They are able to influence a damaged DNA by correcting it, making it become normal again. Click here to learn more.

Here is a list of the trace minerals contained in Mineral Magic.:

- Antimony
- Barium Oxide
- Bismuth
- Boron
- Bromine
- Calcium
- Carbon
- Cerium
- Chromium
- Cobalt
- Copper
- Dysprosium
- Erbium
- Europium
- Ferric Oxide
- Gallium
- Gold
- Holmium
- Hydrogen
- Iodine
- Iridium
- Lithium
- Lutetium
- Magnesium
- Manganese Oxide
- Molybdenum
- Neodymium
- Nickel
- Niobium
- Nitrogen
- Oxygen
- Phosphorus
- Platinum
- Potassium Oxide
- Praseodymium
- Rhodium
- Samarium
- Scandium
- Selenium
- Silica
- Silver
- Sodium Oxide
- Strontium
- Terbium
- Thorium
- Thulium
- Tin
- Titania
- Uranium
- Vanadium
- Yttrium
- Zinc
- Zirconium

By taking 1/2 to 1 teaspoon a day of MINERAL MAGIC I have had numerous people tell me that their energy and endurance have all gone up markedly. One 17 year old I know told me that though he only got 3 hours of sleep one night, the next day he took a teaspoon of Mineral Magic and had energy all day. He went to work at 7 am and did great. Another friend told me that he was becoming a couch potato. After work he no longer wanted to go to the gym or do anything other than watch TV. After taking a heaping teaspoon of Mineral Magic he woke up feeling energized and ready to tackle the world. At night he wanted to go to the gym again. He says MINERAL MAGIC is awesome.

I have personally taken the full spectrum mineral products from Water Oz, Eniva, Liquid Colloidal Minerals, Great Salt Lake Ionic Minerals, Mezotrace, Chelated Multi-Minerals and many other mineral supplements. MINERAL MAGIC is the best one I've found. I believe part of the reason is due to the fact that the monoatomic minerals in MINERAL MAGIC are protected from magnetic fields by putting the powder into a Mylar lined cylinder. Monoatomic minerals will escape from the solution they belong to if exposed to magnetic fields. Most commercial mineral supplements are exposed to processing which could cause the loss of any of these monoatomic minerals.

As you can see minerals are absolutely crucial for everyone's needs. MINERAL MAGIC can resurrect you in many ways. People have reported increased mental and physical energy, elimination of cravings for unhealthy foods, normalization of blood sugar, loss of body fat, and restored hair color. MINERAL MAGIC is one of those foundational products that is essential to health and most people can feel its effect within a day of taking it.

"Strive to preserve you health, and in this you will the better succeed in proportion as you keep clear of the physicians." LEONARDO DA VINCI 1451

Life in all its Fullness is Nature Obeyed,

Stephen Heuer,
