

Premier Multi-Pollen Extract

For Superior Energy & Health,
Especially For the Urinary Tract*

Pollen

Pollen is nutrient-rich and chemically very complex, but the exact composition depends upon the plant which produced the pollen. Unfortunately, variations in the composition of pollens from different plants have led to disputes in the scientific literature over benefits and efficacy.

Therefore, we have chosen a blend of several grade 10 pollen sources to allow us to achieve an optimal, proprietary amino acid and phytosterol profile with the broadest range of beneficial effects.

Guaranteed Potent: 100% Allergen-Free

The process that yields an allergen-free pollen is the state-of-the-art. Once clean and 100% allergen-free, the pollen undergoes novel proprietary extraction processes to assure concentration of both the water and lipid soluble components. The process perfectly concentrates the widest range of these delicate phytonutrients. The process also demands tenacity. It takes 10,000 flower tops to yield just 1 kilogram of once living pollen extract.

Get The Best Pollen Extract

- **Unique breakthrough in pollen processing**
Breaks the pollen's tough outer casing; liberates the full spectrum of phytonutrients, making them fully bio-available
Unlike other pollen products which are typically poorly digested
- **Multiple sources of European pollen to ensure the broadest range of phytonutrients**
Not just one pollen source with a narrow range of factors
- **Pollen collected only from pesticide-free, pure water areas in European countrysides**
Not pollen from American, pesticided, poorly grown flowers
- **Special pollen cleaning process: 100% allergen-free**
No dust, dirt, gum or impure resins
- **100% pure vegetable capsules: no binders or fillers**
No tablets with toxic tagalong fillers, binders or glues
No magnesium stearate (a hydrogenated oil)
No gelatin capsules with toxic preservatives & an inferior absorption profile

Pollen's Phytonutrient Content

Premier Multi-Pollen Extract contains European pollen fractions from multiple sources which are standardized according to our proprietary, highly effective amino acid and phytosterol profile. Our pollen extract is guaranteed to contain beta-sitosterol, diamines and derivatives of feruloylputrescine (FP), cyclic hydroxamic acid as 2, 4 dihydroxy-2H-1, 4-benzoxazin-3 (4H)-one (DIBOA), secalosides A and B, kaemperferols, luteolin, crude protein and rutin. The following phytonutrients are listed in ranges due to the naturally occurring variations in batch to batch of living pollen sources. Each 100% vegetable capsule contains:

Pollen Nutrients	Amount
Total Multi-Pollen Extract	300 mg.
Amino Acids	up to 72 mg.
Free Amino Acids	up to 20 mg.
Lipids	3 to 65 mg.
Carbohydrates	up to 143 mg.
Simple Sugars	13 to 33 mg.
Carotenoids and flavonoids	7 to 8 mg.
Vitamin C	up to 20 mg.
Stabilized rice bran (with 100 known antioxidants)	150 mg.

Traditional Uses

Written records indicate that pollen has been used as a food and as a medicine for at least 2,000 years. In China typha pollen (*puhuang* from the flowers of the cattail *Typha* spp.) was described in the *Shen Nong Ben Cao Jin* (circa 200 B.C. to 100 A.D.) and has been part of the medical literature since the 7th century A.D.

Pharmacological and Biological Activity

Reviews of scientific studies with pollen generally stress the importance of the pollen source. Meticulous processing to assure potency and freshness is also a critical yardstick of pollen benefits. Finally the many potential allergens must be meticulously eliminated or the benefits can be outweighed by the allergic reactions.

Premier Multi-Pollen Extract is a collage of the best source pollens processed using state-of-the-art technology and equipment yielding the most potent, non-toxic, chemical free, 100% allergen-free pollen extract. Simply, the best of the best.
