

What is QRA™?

Quantum Reflex Analysis™

The Breakthrough Healing Science of the 21st Century
An Accurate, Rapid Testing and Self-Treatment System That Really Works

Why Suffer?

- **What is QRA?** QRA™ (Quantum Reflex Analysis) is a unique, highly effective system of testing the bio-energetic status of the body's key organs and glands using a university-proven muscle testing technique of medically accepted reflex points. During a QRA™ session, your practitioner will test key points on the surface of your body to determine their status.
- **How can QRA help me?** Using QRA™, your practitioner can quickly pinpoint problem areas and determine the precise nutrients and the exact amounts needed to rapidly restore the ideal cellular resonance for that area.
- **What is an IF?** IF stands for "interference field". An IF is an area of the body where there has been previous trauma such as an old scar or a whiplash from a car accident. Even though a trauma may be very old and is no longer painful, it can still act like a powerful short-circuit of the body's natural energy flow to a specific organ or gland, thus creating many problems – often unresolvable even with many types of treatment.
- **Do you have hidden IFs?** IFs are extremely common and are routinely missed on standard practitioner evaluations. Often, the root cause of many problems is due to hidden IFs. Now QRA™ can quickly identify if you have IFs and how to eliminate them. See back page for examples of common IFs.
- **Eliminating IFs.** For the first time in history, QRA™ delivers an easy, self-administered method to permanently eliminate IFs and the cascade of problems they cause.
- **Thimble or Wheel Barrow?** Once your active IFs are eliminated, a thimble full of nutritional supplements can now deliver what a wheel barrow full previously could not. Once the "short circuits" in your biofield (the IFs) have been erased through QRA, the body can return to its ideal cellular resonance and most ideal health.

After QRA™

Experience the QRA™ Difference for yourself!
